

AIGdoolee

partnering progress

**Capability
Statement**

AlGdoolee acknowledges traditional custodians of country throughout Australia and their continuing connection to the land, waters and community. We pay our respects to all members of Indigenous communities and their cultures; and to Elders past, present and emerging.

Health & Safety, Environment and Quality

AlGdoolee is firmly committed to the principles of workplace health and safety. The company's strategy is designed to encourage a climate of continuous improvement, with a "risk-aware, not risk-averse" approach to managing health and safety in the workplace.

The company makes every effort to maintain the delicate balance between any activities and preserving the environment.

Quality is more than just delivering an outstanding project; it's central to

everyday operations. The AlGdoolee team endeavours to incorporate quality controls into all facets of business.

AlGdoolee has been assessed and certified by Compass Assurance Services to the following management systems, standards and guidelines:

- ISO 45001:2018 Occupational Health and Safety Management Systems
- ISO 14001:2015 Environmental Management Systems
- ISO 9001:2015 Quality Management Systems

Combining strengths, skillsets and solutions

AlGdoolee is a multi-disciplinary engineering company specialising in civil construction, water management and product & waste containment.

A joint venture from two highly reputable local contractors – bringing together the skillsets of Australian Indigenous Group (AIG) and Doolee Construction – AlGdoolee services the mining, resources, infrastructure and government sectors throughout Western Australia and beyond. After a successful period working together, the companies now combine the specialisations of both teams in a mid-size operation that delivers projects in the \$1m–25m contract space.

AlGdoolee is majority Indigenous-owned – with strong links to the Puutu Kunti Kurrama and Pinikura (PKKP) community in the Pilbara – and prides itself on genuine First Nations engagement and employment opportunities. Within a skilled and stable workforce, approximately 25% of employees are Indigenous; a number the company is committed to see grow into the future.

With decades of combined experience, AlGdoolee has a proven track record of numerous complex projects – successfully completed in a wide variety of environments. Its performance is underpinned by highly trained personnel, supported by continued investment in company-owned and maintained plant and machinery.

AlGdoolee's self-performed single-contractor solutions ensure that clients enjoy seamless project delivery and clear-cut responsibility throughout – saving time and money.

Through an active hands-on approach, and always upholding integrity and pride of work, AlGdoolee has a total commitment to engineering excellence.

Civil Construction

AIGdoolee provides a range of modern earthworks and concrete construction services to all sectors, working both directly for or alongside major contractors.

The company enjoys an enviable reputation for reliability and technical expertise at all levels. This expertise has been gained through the successful execution of many demanding projects – including multiple greenfield and brownfield mine sites.

By involving AIGdoolee at an early stage, clients can enjoy the advantages of the organisation’s experience in developing access and excavation strategies, logistics, operational and risk management, resource allocation and waste control. In this way, most construction challenges can be identified, anticipated and managed ahead of time, protecting both schedules and budgets.

AIGdoolee’s managers and supervisors are experienced at planning work that takes place within operating environments, ensuring that construction activities have the least possible impact on ongoing operations and overall productivity.

The company’s highly competent and knowledgeable in-house teams ensure that the most efficient construction solutions are employed throughout, taking into account project imperatives and environmental conditions.

With AIGdoolee, clients benefit from fully integrated earthworks and concrete packages, ensuring single-point responsibility throughout and avoiding the problems encountered when dealing with multiple contractors.

AIGdoolee is committed to providing lasting, valued service by faithfully adhering to all required safety, regulatory and statutory requirements throughout project operations.

AIGdoolee’s civil expertise includes:

- Bulk and detailed earthworks
- Reinforced concrete construction
- Geomembrane supply and installation
- Roadworks
- Access tracks construction
- In-ground services
- Drainage
- Tailings dam construction
- Airside and landside airport works
- Drill pads construction
- Vegetation clearing

Equipment & Plant

AIGdoolee’s continued investment in a modern fleet of company-owned plant and vehicles means that sites always have access to the very latest equipment from world-class manufacturers – delivering safe, accurate and efficient project outcomes.

- Excavators (up to 50t)
- Dump trucks (various)
- Rollers and compactors (pad foot and smooth drum)
- Graders (120H and 14M)
- Loaders (various sizes)
- Dozers (D8, D9 and D10)
- Water carts (various sizes)
- Service trucks
- Hydrovac
- Six-wheel tip trucks
- Posi-Tracks (various)
- GPS control available
- Mine spec vehicles

Water Management

AIGdoolee delivers total water management services to mining, resources, infrastructure and government enterprises throughout Australia – ensuring the safe, efficient and compliant continuity of operations.

These services range from quality-assured construction and commissioning through to operation and maintenance, delivering integrated solutions to the widest range of water management requirements.

AIGdoolee’s water and wastewater experts have detailed experience of dealing with challenges across all industry sectors, and the company’s know-how can help plan innovative and cost-saving solutions.

By bringing together AIGdoolee’s civil engineering expertise with this professional team’s specialist knowledge of containment and distribution systems – and the fleet of company-owned plant and equipment – clients can be confident that projects will be delivered safely, effectively, on schedule and to specification.

AIGdoolee provides services in the construction, commissioning, operation and maintenance of:

- Water delivery systems
- Farm dams
- Storage tanks
- Pipelines
- Mine de-watering
- Filtration plants
- Reservoirs
- Water storage
- Wastewater treatment

Product & Waste Containment

Providing comprehensive Australia-wide solutions, AIGdoolee demonstrates industry-leading competencies across a range of environmental containment operations.

AIGdoolee’s experienced personnel can advise on the optimal strategies for containing wastes in any situation, from earthworks and civil construction to geomembrane supply and installation – whether designed for temporary control or long-term permanent containment.

Partnering all industry sectors, AIGdoolee brings a level of expertise that ensures solutions are appropriate, effective and regulatorily compliant.

The company’s integrated service delivery approach means clients enjoy single-point responsibility from design through construction to commissioning – avoiding the problems associated with multiple contractors and giving customers full confidence in the robustness and sustainability of all solutions.

AIGdoolee’s product and waste containment solutions include:

- Landfill cell construction
- FOGO development
- Capping systems
- Lagoons
- Tailings
- Landscape stabilisation
- Gas extraction systems
- Leak detection
- Erosion control
- Remote monitoring
- Mine site rehabilitation

People

AIGdoolee comprises a tight-knit, innovative, friendly and highly experienced team.

Its people come from a variety of backgrounds, and the company celebrates this diversity. AIGdoolee takes particular pride in its track record as a significant Indigenous employer; and provides opportunities for training and development for all across the range of capabilities and projects.

From experienced specialists to emerging talent, AIGdoolee people share a common drive to succeed, an enthusiasm for their work, and a passion for providing exceptional service to clients.

Partners

Australian Indigenous Group Pty Ltd delivers practical, high-quality civil and earthworks services to mining clients across Western Australia. Led by vastly experienced management – and with 100% Indigenous ownership of Puutu Kuntj Kurrama and Pinikura (PKKP) Pilbara origin – AIG's knowledgeable team members work closely with clients to deliver resourceful and cost-effective solutions safely, while protecting the environment.

Doolee Construction Pty Ltd was established in 2014 by Eanna Doolin and Francis Lee, and is a fully Australian-owned private company working throughout Australia and New Zealand. A specialist civil and associated industries contractor, Doolee is led by a team with cumulative 75 years' experience in the successful and safe delivery of on-time and on-budget projects – not only in Australia and New Zealand, but also the United Kingdom and Ireland.
